***Claim Rejections - 35 USC § 112***

Claims 1-8 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1 line 7 for support and piston ring" is not a coherent statement.

In claim 3 line 1 "said elements" are confusing, because no "elements" have been claimed.

In claim 4 line 1-2 "said support elements" should be --said support means--, to agree with claim 1 line 10. In claim 4 line 1-2 "support elements comprises a coil spring" appears to contradict claim 1 line 14-16, since the coil spring can't provide a complete seal.

In claim 7 line "generally complementary in cross-sectional configuration" is confusing, suggest that it be replaced by --having a cross-sectional configuration corresponding--.

Claims not specifically mentioned are indefinite, since they depend from claim 1.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 6-8 are rejected under 35 U.S.C. § 102(b) as being clearly anticipated by Rao. Rao discloses a compressible elastomeric support ring (e.g. 32) for a piston ring (e.g. 42), with a end gap sealing ring (41, 80).

Claims 1, 3 5, 7 and 8 are rejected under 35 U.S.C. § 102(b) as being clearly anticipated by Mcgee. Mcgee discloses a compressible elastomeric support ring (16) for a piston ring (12).

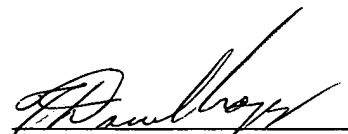

Art Unit: 3745

Claims 1, 2, and 4, inasmuch as they are definite, are rejected under 35 U.S.C. § 102(b) as being clearly anticipated by Reiland et al. Reiland et al discloses a plurality of coil springs (18) for a piston ring (16).
